

SWANSON FLO

Swanson Flo provides **innovative process control solutions** to the Municipal market through quality equipment and experienced application engineering. Our company serves the Water and Wastewater industries and provides product and expertise to both Municipalities & Consulting Engineers.

Valves & Instrumentation

Multi-turn and quarter-turn electric actuators for valves and dampers, pneumatic scotch-yoke valve actuators.

McWane Co – Clow & Waterman. Full range of AWWA waterworks products: butterfly valves, plug valves, check valves, gate valves (rotating disc, double-disc, solid and resilient wedge)

Resilient seat and high performance butterfly valves, pneumatic actuators and accessories.

Ball valve and actuation solutions for the process and purity markets.

Monitoring and communications for discrete valves. Hazardous location wiring and fieldbus solutions.

Liquid level gages and valves, steam gages, capacitance columns and switches, magnetic gages, armored tubular and sight flow indicators.

Gearboxes designed for engineered solutions and demanding applications for both torque and thrust applications.

Process instrumentation for measurement of flow, pressure, temperature, level and analytical properties.

Coriolis mass, differential pressure, magnetic, positive displacement, turbine, ultrasonic and vortex flow meters.

Pressure and temperature process gauges and instrumentation.

SCADAPack hardware and software solutions, Trio radios, ClearSCADA host software, Accutech (Foxboro) wireless instruments.

OEM pressure transducers and switches. Continuous level sensors and level switches. Flow meters and flow switches.

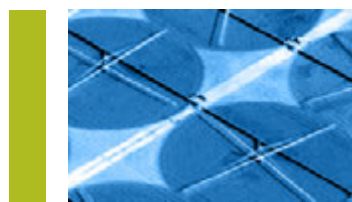

High performance thermal mass flow meters for gas flow that provide an "In-Situ Calibration Check".

Panalarm annunciators, Rochester Instruments power quality equipment, Scientific Columbus transducers, Jemstar revenue meters.

Multifunction calibrators, HART communicators, instrument asset management.

SWANSON FLO PERFORMANCE

Factory certified technicians, repair and parts for:

Foxboro[®]

by **Schneider** Electric

We also repair equipment from other manufacturers.

Multi-brand factory trained control valve repair center

Swanson Flo Performance supports every process control customer with region-based, full-capability service and repair. Our factory-certified technicians provide you with a complete overhaul and repair of the control valves, actuators, and instrumentation. Equipment is fully disassembled, inspected, cleaned, reassembled, calibrated, and tested to meet factory original standards. Swanson Flo Performance utilizes only factory OEM parts to repair your equipment.

Precision, Performance, Perfection

- COMMISSIONING** - To ensure that equipment performs to expected specifications
- MECHANICAL INSPECTION** - Detailed reports on the mechanical health of your valves
- VALVE REPAIR** - Returning your valves to "like new" condition
- ONSITE REPAIR** - Bringing resources and equipment to you
- OEM PARTS** - Certified original manufactured parts maintaining highest standards
- RE-INSTRUMENTATION** - Upgrading performance and equipment to meet ever-changing needs
- SITE SURVEYS** - Gathering plant data for asset management
- TRAINING** - Hands-on technical and practical training for you
